

Posting of Redispatch Data

18 CFR §37.6(j)(2) (2008)

(j) Posting redispatch data

(1) The Transmission Provider must allow the posting on OASIS of any third party offer to relieve a specified congested transmission facility.

There have been no third party offers to relieve specified congestion on any SCE&G Transmission Facility.

(2) The Transmission Provider must post on OASIS (i) its monthly average cost of planning and reliability redispatch, for which it invoices customers, at each internal transmission facility or interface over which it provides redispatch service and (ii) a high and low redispatch cost for the month for each of these same transmission facilities. The transmission provider must post this data on OASIS as soon as practical after the end of each month, but no later than when it sends invoices to transmission customers for redispatch-related services.

SCE&G has not invoiced any Customer for redispatch service.
