Pursuant to FERC Order 890, SCE&G is required to post the Load Forecast and the Actual Load for each day. The numbers are provided to meet the requirements of FERC Order 890 and are not to be used as billing determinants.

The data shown is created by the SCE&G load forecast system and is based on public and proprietary weather information available at the time the forecasts are made. The load forecast assumptions include the day of the week, applicable holidays, load patterns from prior years, weather conditions and forecasts. NOAA's weather forecast can be found at www.noaa.gov.
